John O. Rawlings, Sastry G. Pantula, David A. Dickey

Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) John O. Rawlings, Sastry G. Pantula, David A. Dickey

Least squares estimation, when used appropriately, is a powerful research tool. A deeper understanding of the regression concepts is essential for achieving optimal benefits from a least squares analysis. This book builds on the fundamentals of statistical methods and provides appropriate concepts that will allow a scientist to use least squares as an effective research tool.

Applied Regression Analysis is aimed at the scientist who wishes to gain a working knowledge of regression analysis. The basic purpose of this book is to develop an understanding of least squares and related statistical methods without becoming excessively mathematical. It is the outgrowth of more than 30 years of consulting experience with scientists and many years of teaching an applied regression course to graduate students. **Applied Regression Analysis** serves as an excellent text for a service course on regression for non-statisticians and as a reference for researchers. It also provides a bridge between a two-semester introduction to statistical methods and a theoretical linear models course.

Applied Regression Analysis emphasizes the concepts and the analysis of data sets. It provides a review of the key concepts in simple linear regression, matrix operations, and multiple regression. Methods and criteria for selecting regression variables and geometric interpretations are discussed. Polynomial, trigonometric, analysis of variance, nonlinear, time series, logistic, random effects, and mixed effects models are also discussed. Detailed case studies and exercises based on real data sets are used to reinforce the concepts. The data sets used in the book are available on the Internet.

From reader reviews:

Thomas Barreto:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Might be reading a book might be option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the publication untitled Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) can be great book to read. May be it could be best activity to you.

Angeline Stallings:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you just dont know the inside because don't judge book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer can be Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) why because the wonderful cover that make you consider about the content will not disappoint a person. The inside or content is definitely fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

Robert Williams:

You can find this Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) by look at the bookstore or Mall. Only viewing or reviewing it could possibly to be your solve challenge if you get difficulties to your knowledge. Kinds of this reserve are various. Not only by means of written or printed and also can you enjoy this book through e-book. In the modern era similar to now, you just looking of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose suitable ways for you.

Anne Braden:

Many people said that they feel bored when they reading a publication. They are directly felt the item when they get a half parts of the book. You can choose often the book Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) to make your own personal reading is interesting. Your personal skill of reading skill is developing when you similar to reading. Try to choose straightforward book to make you enjoy to study it and mingle the idea about book and examining especially. It is to be 1st opinion for you to like to open up a book and learn it. Beside that the publication Applied Regression Analysis: A Research Tool (Springer Texts in Statistics) can to be a newly purchased friend when you're really feel alone and confuse in what must you're doing of these time.
