## **Draw the Lightning Down: Benjamin Franklin and Electrical Technology in the Age of Enlightenment**

Michael B. Schiffer, Carrie L. Bell

Most of us know—at least we've heard—that Benjamin Franklin conducted some kind of electrical experiment with a kite. What few of us realize—and what this book makes powerfully clear—is that Franklin played a major role in laying the foundations of modern electrical science and technology. This fast-paced book, rich with historical details and anecdotes, brings to life Franklin, the large international network of scientists and inventors in which he played a key role, and their amazing inventions. We learn what these early electrical devices—from lights and motors to musical and medical instruments—looked like, how they worked, and what their utilitarian and symbolic meanings were for those who invented and used them. Against the fascinating panorama of life in the eighteenth century, Michael Brian Schiffer tells the story of the very beginnings of our modern electrical world.

The earliest electrical technologies were conceived in the laboratory apparatus of physicists; because of their surprising and diverse effects, however, these technologies rapidly made their way into many other communities and activities. Schiffer conducts us from community to community, showing how these technologies worked as they were put to use in public lectures, revolutionary experiments in chemistry and biology, and medical therapy. This story brings to light the arcane and long-forgotten inventions that made way for many modern technologies—including lightning rods (Franklin's invention), cardiac stimulation, xerography, and the internal combustion engine—and richly conveys the complex relationships among science, technology, and culture.

### **From reader reviews:**

#### **Cindy Grant:**

What do you about book? It is not important along with you? Or just adding material when you need something to explain what the ones you have problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? All people has many questions above. They have to answer that question due to the fact just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need this particular Draw the Lightning Down: Benjamin Franklin and Electrical Technology in the Age of Enlightenment to read.

#### **John Carroll:**

Now a day people who Living in the era just where everything reachable by match the internet and the resources in it can be true or not involve people to be aware of each facts they get. How people have to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Examining a book can help individuals out of this uncertainty Information particularly this Draw the Lightning Down: Benjamin Franklin and Electrical Technology in the Age of Enlightenment book since this book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

#### **Philip Martin:**

Playing with family within a park, coming to see the coastal world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try thing that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Draw the Lightning Down: Benjamin Franklin and Electrical Technology in the Age of Enlightenment, you may enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

#### **Jack Lacasse:**

As a college student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the educator want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring and also can't see colorful images on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Draw the Lightning Down: Benjamin Franklin and Electrical Technology in the Age of

Enlightenment can make you experience more interested to read.
