This book combines, for the first time, the topics of radar polarimetry and interferometry. This combination was first developed in 1997 and has since become a major topic in radar sciences and their applications, in particular to space sciences. In its simplest form it concerns the study of interferograms formed by combining waves with different polarisations and their exploitation to infer important physical properties of the planetary surface being investigated.

The book is written in three main sections. The first four chapters provide a detailed coverage of all major topics of polarimetry, including its basis in electromagnetic scattering theory, decomposition theorems, and a detailed analysis of the entropy/alpha approach. The next chapter offers a brief introduction to radar interferometry, before developing in three chapters the important new topic of polarimetric interferometry. In this way the book provides a complete treatment of the subject, suitable for those working in interferometry who wish to know about polarimetry, or vice versa, as well as those new to the topic who are looking for a one-stop comprehensive treatment of the subject. The emphasis throughout is on the application of these techniques to remote sensing, and the book concludes with a set of practical examples to illustrate the theoretical ideas.

From reader reviews:

Ruth Beasley:

Book is definitely written, printed, or illustrated for everything. You can recognize everything you want by a reserve. Book has a different type. As we know that book is important matter to bring us around the world. Alongside that you can your reading skill was fluently. A book Polarisation: Applications in Remote Sensing will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that open or reading the book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you seeking best book or suited book with you?

John Masterson:

In this 21st one hundred year, people become competitive in each way. By being competitive now, people have do something to make all of them survives, being in the middle of the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated this for a while is reading. That's why, by reading a book your ability to survive enhance then having chance to stay than other is high. For you personally who want to start reading the book, we give you this particular Polarisation: Applications in Remote Sensing book as beginner and daily reading publication. Why, because this book is greater than just a book.

Amber Payne:

Do you among people who can't read pleasant if the sentence chained from the straightway, hold on guys this specific aren't like that. This Polarisation: Applications in Remote Sensing book is readable through you who hate those straight word style. You will find the information here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer associated with Polarisation: Applications in Remote Sensing content conveys objective easily to understand by lots of people. The printed and e-book are not different in the content but it just different available as it. So , do you continue to thinking Polarisation: Applications in Remote Sensing is not loveable to be your top checklist reading book?

Kelly Jackson:

Polarisation: Applications in Remote Sensing can be one of your starter books that are good idea. All of us recommend that straight away because this book has good vocabulary that will increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to put every word into joy arrangement in writing Polarisation: Applications in Remote Sensing but doesn't forget the main place, giving the reader the hottest along with based confirm resource details that maybe you can be one among it. This great information may drawn you into new stage of crucial pondering.
