Tent City Urbanism: From Self-Organized Camps to Tiny House Villages Andrew Heben

Tent City Urbanism explores the intersection of the "tiny house movement" and tent cities organized by the homeless to present an accessible and sustainable housing paradigm that can improve the quality of life for everyone.

While tent cities tend to evoke either sympathy or disgust, the author finds such informal settlements actually address many of the shortfalls of more formal responses to homelessness. Tent cities often exemplify self-management, direct democracy, tolerance, mutual aid, and resourceful strategies for living with less. This book presents a vision for how cities can constructively build upon these positive dynamics rather than continuing to seek evictions and pay the high costs of policing homelessness.

The tiny house village provides a path forward to transitional and affordable housing within the grasp of a local community. It offers a bottom-up approach to the provision of shelter that is economically, socially, and environmentally sustainable--both for the individual and the city. The concept was first pioneered by Portland's Dignity Village, and has since been re-imagined by Eugene's Opportunity Village and Olympia's Quixote Village. Now this innovative model has emerged from the Northwest to inspire projects in Madison, Austin, and Ithaca, and is being pursued by advocacy groups throughout the country.

Along with documenting and articulating the roots of this budding movement, the book provides a practical guide to help catalyze new and existing initiatives in other areas.
