Sustainable Building with Earth

Horst Schroeder

Sustainable Building with Earth Horst Schroeder

This book provides an insightful overview of the current state of earth building. The author approaches the subject from the perspective of the building material's life cycle, featuring in-depth explanations of the cycle's individual steps: extraction and classification of construction soil; production of earth building materials and earthen structures; planning, construction and renovation of earth buildings; and demolition and recycling of earthen structures. This unique resource provides examples of sophisticated earth building projects and illustrates the diverse applications of earth as a building material. Compared to conventional mineral building materials, earth possesses particularly positive ecological qualities such as its energy balance and recyclability. Architects, engineers, students, manufacturers and distributors of building materials, building contractors, building biologists, public authorities and preservationists will benefit from this book's ample coverage of restoring, optimizing and building with this material of the past, present and future.

From reader reviews:

Peter Zimmerman:

Information is provisions for people to get better life, information these days can get by anyone in everywhere. The information can be a know-how or any news even a concern. What people must be consider when those information which is within the former life are hard to be find than now is taking seriously which one is acceptable to believe or which one often the resource are convinced. If you obtain the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Sustainable Building with Earth as the daily resource information.

Kelly Livingston:
