## **ELECTRICIAN'S BOOK-THE EXPERIMENT OF ELECTRICITY PRODUCTION (20 MODULES SERIES)Lorenz Force** Cornel Barbu

During my working life-time as electrical contractor and engineer I found that most of the electricians I meet will find hard to explain how the electricity is generated. Well established companies do not pay too much attention to the electricians training. IBEW is doing something but not enough. The point is : you need to be a self starter in order to achieve skills to protect yourself and others and be financially well. There is no blame in this is just my intention help them a bit. I know how hard is to support a family, to bring food and things to our loves one since working hard. It remains no time to review and to make theoretical practice in order to understand everything we do.....unless we care about us ! You have the option to achieve all modules from 1 to 20 or to choose the ones important for you in order to understand how the electricity is generated. I will encourage you to achieve the complete package and read them step by step.

This book is about LORENZ FORCE. Conductive materials include a large amount of negative and positive charged particles. Subatomic particles exist in any matter or solids. Let take as example a coil with couple of turns made by copper. Lorentz force interacts with subatomic particles.

In order to see video demonstrations on your kindle device you'll need to download and install dolphin browser because it is the only one supporting flash-player. In case is difficult to do this suggest the reader use their computer to view them

Here is the link for video demonstration,

If this coil moves inside of magnetic environment, LORENZ FORCE acts on particles of electric charge due to a magnetic and the electric field (E&B)
