The Earth's atmosphere is swiss cheese. To avoid the oncoming oxygen crisis, black-sheep heiress, Maeve Aypotu, has been chemically suspended in one of the Archive's plush, underground, multi-million dollar chambers. Scientists claim they can patch everything up in about 15 years, so, just to be safe, the Archive programmed the chambers to open in 17 years.

And then, everything on Earth went wrong.

Up on the surface, Pluto has taken control of the planet, scorching away all signs of human civilization and reconstructing the environment to suit the Plutian's lucrative dragon trade. Humans are now laborers, using survival and repopulation as currency among their Houses.

The Archivers, finally emerging from their chambers, are entering into a whole new world. Learning to trust this new community of humans may need to start small—with the fusion of one powerful Rha and one bad ass black sheep—if a damaged race ever hopes to regain control of their alien Earth.
