## **Power Programming with RPC (Nutshell Handbooks)** John Bloomer

RPC, or remote procedure calling, is the ability to distribute parts of a program to other computers on a network. An RPC facility manages the exchange of data between computers to make remote execution transparent to the user. Distributed applications based on RPC can utilize distributed network resources and increase significantly the computing power brought to bear on complex problems. An RPC facility is the fundamental element of a distributed computing environment. The book builds a working understanding of RPC programming through examples. Sun RPC, the de facto standard on UNIX systems, is covered in detail. Interprocess communication and other related UNIX programming topics are also covered. The standard-issue RPC documentation is difficult to understand and lacks real-world examples. There are, in addition, many techniques to learn. This book, written from a programmer's perspective, shows you what you can do with RPC and presents a framework for learning it. Contents include:

- Foundations of remote procedure calling; what it is, how it works, and which vendors support it.
- What RPC offers to application and product developers. How RPC fits into a distributed computing environment.
- ONC and DCE, a comparison of their similarities and differences.
- How to develop, debug, and deploy networked applications.
- Understanding the interprocess control (IPC) mechanisms on which RPC is based.
- Using remote procedure calling in parallel/distributed processing and scheduling.
- Using remote procedure calling with windowing systems.
- Examples of distributed applications using both single and multiple concurrent servers.

### **From reader reviews:**

#### **Mary Alexander:**

Hey guys, do you want to find a new book to learn? Maybe the book with the headline Power Programming with RPC (Nutshell Handbooks) suitable to you? Typically the book was written by a famous writer in this era. Often the book entitled Power Programming with RPC (Nutshell Handbooks) is the one of several books that everyone reads now. This particular book was inspired many men and women in the world. When you read this publication you will enter the new way of measuring that you ever knew before. The author explained their plan in the simple way, therefore all of people can easily understand the core of this guide. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this particular book.

#### **Earline Martin:**

This Power Programming with RPC (Nutshell Handbooks) is a new way for you who has curiosity to look for some information because it relieves your hunger associated with. Getting deeper you onto it getting knowledge more you know or you who still having little digest in reading this Power Programming with RPC (Nutshell Handbooks) can be the light food in your case because the information inside this kind of book is easy to get by simply anyone. These books build itself in the form which can be reachable by anyone, yeah I mean in the e-book type. People who think that in guide form make them feel drowsy even dizzy this publication is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for you actually. So, don't miss that! Just read this e-book style for your better life along with knowledge.

#### **Celia Robertson:**

That book can make you to feel relax. That book Power Programming with RPC (Nutshell Handbooks) was colorful and of course has pictures around. As we know that book Power Programming with RPC (Nutshell Handbooks) has many kinds or style. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore, not at all of book usually are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that.

#### **Hattie Robb:**

What is your hobby? Have you heard which question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as reading through become their hobby. You must know that reading is very important and book as to be the issue. Book is important thing to add your knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them is actually Power Programming with RPC (Nutshell Handbooks).
