Rule Extraction from Support Vector Machines (Studies in Computational Intelligence)

Rule Extraction from Support Vector Machines (Studies in Computational Intelligence)

Support vector machines (SVMs) are one of the most active research areas in machine learning. SVMs have shown good performance in a number of applications, including text and image classification. However, the learning capability of SVMs comes at a cost – an inherent inability to explain in a comprehensible form, the process by which a learning result was reached. Hence, the situation is similar to neural networks, where the apparent lack of an explanation capability has led to various approaches aiming at extracting symbolic rules from neural networks. For SVMs to gain a wider degree of acceptance in fields such as medical diagnosis and security sensitive areas, it is desirable to offer an explanation capability. User explanation is often a legal requirement, because it is necessary to explain how a decision was reached or why it was made. This book provides an overview of the field and introduces a number of different approaches to extracting rules from support vector machines developed by key researchers. In addition, successful applications are outlined and future research opportunities are discussed. The book is an important reference for researchers and graduate students, and since it provides an introduction to the topic, it will be important in the classroom as well. Because of the significance of both SVMs and user explanation, the book is of relevance to data mining practitioners and data analysts.

From reader reviews:

Jennifer Stewart:

Here thing why that Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) are different and reputable to be yours. First of all looking at a book is good however it depends in the content of the usb ports which is the content is as scrumptious as food or not. Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) giving you information deeper and in different ways, you can find any guide out there but there is no book that similar with Rule Extraction from Support Vector Machines (Studies in Computational Intelligence). It gives you thrill looking at journey, its open up your personal eyes about the thing that will happened in the world which is probably can be happened around you. It is possible to bring everywhere like in playground, café, or even in your approach home by train. Should you be having difficulties in bringing the published book maybe the form of Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) in e-book can be your substitute.

Mark Jones:

Nowadays reading books become more and more than want or need but also become a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book this improve your knowledge and information. The data you get based on what kind of reserve you read, if you want drive more knowledge just go with education books but if you want feel happy read one together with theme for entertaining including comic or novel. The Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) is kind of guide which is giving the reader unstable experience.

Patricia Clay:

Reading a reserve tends to be new life style with this era globalization. With studying you can get a lot of information that will give you benefit in your life. With book everyone in this world could share their idea. Publications can also inspire a lot of people. Many author can inspire their reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the ability about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on earth always try to improve their talent in writing, they also doing some analysis before they write to the book. One of them is this Rule Extraction from Support Vector Machines (Studies in Computational Intelligence).

Christopher McCrady:

This Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) is new way for you who has attention to look for some information because it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) can be

the light food for yourself because the information inside this particular book is easy to get by means of anyone. These books create itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in book form make them feel tired even dizzy this publication is the answer. So there is absolutely no in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss this! Just read this e-book variety for your better life in addition to knowledge.
