Performance Analysis of Complex Networks and Systems

Piet Van Mieghem

Performance Analysis of Complex Networks and Systems Piet Van Mieghem

This rigorous, self-contained book describes mathematical and, in particular, stochastic and graph theoretic methods to assess the performance of complex networks and systems. It comprises three parts: the first is a review of probability theory; Part II covers the classical theory of stochastic processes (Poisson, Markov and queueing theory), which are considered to be the basic building blocks for performance evaluation studies; Part III focuses on the rapidly expanding new field of network science. This part deals with the recently obtained insight that many very different large complex networks - such as the Internet, World Wide Web, metabolic and human brain networks, utility infrastructures, social networks - evolve and behave according to general common scaling laws. This understanding is useful when assessing the end-to-end quality of Internet services and when designing robust and secure networks. Containing problems and solved solutions, the book is ideal for graduate students taking courses in performance analysis.

From reader reviews:

Lucile Brown:

Reading a publication can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new data. When you read a reserve you will get new information because book is one of a number of ways to share the information or maybe their idea. Second, reading a book will make an individual more imaginative. When you reading a book especially fictional book the author will bring you to definitely imagine the story how the people do it anything. Third, you may share your knowledge to other folks. When you read this Performance Analysis of Complex Networks and Systems, you can tells your family, friends and also soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a reserve.

Harry Crawford:

Playing with family in a very park, coming to see the coastal world or hanging out with good friends is thing that usually you will have done when you have spare time, and then why you don't try issue that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Performance Analysis of Complex Networks and Systems, you are able to enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't obtain it, oh come on its identified as reading friends.

Francis Mason:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are receiving problem with the book when compared with can satisfy your limited time to read it because all of this time you only find e-book that need more time to be read. Performance Analysis of Complex Networks and Systems can be your answer as it can be read by you actually who have those short extra time problems.

Gladys Jackson:

Guide is one of source of understanding. We can add our information from it. Not only for students but additionally native or citizen require book to know the upgrade information of year in order to year. As we know those guides have many advantages. Beside we all add our knowledge, also can bring us to around the world. With the book Performance Analysis of Complex Networks and Systems we can acquire more advantage. Don't you to definitely be creative people? To become creative person must like to read a book. Simply choose the best book that acceptable with your aim. Don't end up being doubt to change your life by this book Performance Analysis of Complex Networks and Systems. You can more appealing than now.
