**Aquaponic Food Product - Raising fish and plants for food and profit** Rebecca L. Nelson with contributions from John S. Pade

Aquaponics can be used to sustainably raise fresh fish and vegetables for a family, to feed a village or to generate profit in a commercial farming venture. Aquaponics is the combination of aquaculture (fish farming) and hydroponics (soilless plant culture). In aquaponics, the nutrient-rich water from raising fish provides fertilizer for the plants and the plants help to purify the water the fish live in.
