The Evolution of Theory in International Relations (Studies in International Relations)

The Evolution of Theory in International Relations (Studies in International Relations)

In "The Evolution of theory in International Relations", the editor and contributors seek to provide a broad perspective on the evolution of theory and theorizing in the field of international relations. This collection of essay represents a contemporary reassessment of the state of theory within the discipline providing important statements on realist thought, neo-realist theory, structural theory, behaviouralism, formal modelling, and alliances theory. While no single theme dominates the book, the editor points to common concerns that emerge - the value of theory in international relations and its necessity for sustaining the discipline and the relationship between change and continuity and the problem of change in theoretical analysis.
