"...The first volume in a science-fiction series about a young man who's abducted by benevolent aliens, bio-engineered to superhuman levels and sent back to Earth years later to stop an alien invasion..." -KIRKUS DISCOVERIES.

IMAGINE discovering a UFO and then having to hide inside of it after the elite unit of the army chases you to it in an attempt to kill you. Imagine having an out of body experience and flying a very advanced spaceship by pure thought. Going against jetfighters and making a mockery of the United States Air force. Imagine having your nerves and senses connected with the ship and feeling what the ship does.

Imagine traveling from Earth to Jupiter in 30 minutes and then exploring Jupiter's ice ocean moon Europa, what ocean aliens will you encounter?

Imagine traveling towards our Sun at the speed of light and thinking you are going to die, only to have your molecules vaporized with the spaceship and transported in subspace through a system called Optic-warp. Imagine waking up on an alien planet in the Andromeda Galaxy that uses virtual worlds as a home city.

Imagine meeting an Alien species 70,000 years ahead of humans, what will they tell you? What will you ask them? What is their species history? How can humans learn from the alien's past mistakes?

Imagine learning Earth is about to be silently attacked by a rival species who want to use our bodies as part of a top secret experimental weapon that can destroy all alien species in the universe; and you are the only one who can help stop this attack. Would you allow alien Nanotechnology to evolve your body to super human levels where you'll be able to: Run and jump like the Hulk, defy and control gravity, create gravity shockwaves, create advanced energy shields, evolve your brain to think and move in Nanoseconds, and create atom ripper projectiles. Would you be up for an adventure of a life time?
